

5-0-15 + 0.1B, 0.75Mn

PRODUCT INFORMATION

Next Level II is a low-salt foliar product exclusive to The Andersons' Farm Center locations. Next level II features a unique nutrient package consisting of essential macro and micronutrients to provide maximum nutrition to the crop during critical growth stages. Next Level II includes boron and manganese, which are essential for many plant processes such as nodule efficiency and pollination.

FEATURES

- Contains nitrogen, potassium, manganese, and boron
- Low potential of burning plant tissue

BENEFITS

- Aids the plant during the stressful reproductive stage
- Enhances the utilization of nitrogen
- Increases yield potential

FREQUENTLY ASKED QUESTIONS

Q: Why do I need a boron and manganese source in my foliar fertilizer?

A: The combination of boron and manganese will help position your crop to maximize yield by enhancing a variety of plant processes. Boron is essential for cell wall development, plant stability, and nodule formation in soybeans. The addition of manganese aids the crop in building carbohydrates and metabolizing nitrogen, also playing a vital role in photosynthesis by affecting chloroplast formation in leaves.

Q: Does Next Level II help alleviate symptoms of yellow flash resulting from herbicide injury?

A: Yellow flash is caused by the application of glyphosate to a soybean crop. Glyphosate immobilizes manganese within the plant, causing the symptoms of yellow flash. Applying Next Level II following symptoms of yellow flash will help alleviate the symptoms by providing supplemental manganese to the crop.

Q: Can I tank mix Next Level II?

A: Next Level II can be tank mixed with most herbicides, fungicides, insecticides, and foliar fertilizers. Always jar test for compatibility.

Q: What rate should Next Level II be applied?

A: Next Level II is recommended to be applied at a rate of 1-2 gallons in soybeans, alfalfa, or hay production. In vegetable production, it is recommended to apply at a rate of 0.5-1.5 gallons.

PRODUCT INFORMATION: Next Level II is a low-salt foliar product exclusive to The Andersons' Farm Center locations. Next level II features a unique nutrient package consisting of essential macro and micronutrients to provide maximum nutrition to the crop during critical growth stages. For best results, use in a program with First Pass, The Andersons' premium soybean starter.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual/institution. Do not mix with calcium based fertilizers.

Foliar Application: Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.
