PROCESSES
- Nine formulating and packaging lines
- Dedicated insecticide lines
- Milling, aspiration and custom blending systems
- Computer-controlled batching
- product size reduction and screening
- Particle size optimization and analysis
- Semi-automatic palletizing

CAPACITY
- Up to one million square feet of warehouse space
- Over 2,500 tons of water storage
- Access to 200,000 tons of bulk raw material storage

CONTRACT MANUFACTURING PARTNER OF CHOICE

Our regional toll processing locations provide logistical advantages that facilitate an optimum "supply chain" philosophy.

THINK OF OUR PROCESSES AS YOUR PROCESSES,
OUR CAPACITY AS YOUR CAPACITY:

A FOCUS ON GROWTH AND DIVERSIFICATION SINCE 1947

For more than 60 years, The Andersons, Inc. has been serving the midwest and inland to the agricultural sector throughout the Eastern Corn Belt. The Andersons’ focus on innovation and improvement has kept it in the forefront of the industry and has allowed it to diversify into new opportunities as well as expand its capabilities. This has helped to build a strong reputation as a leader, beginning with opening the first U.S. soybean meal plant in southern Illinois.

Our manufacturing locations in the U.S. (Iowa, Nebraska, Ohio) and our worldwide subsidiary and joint ventures in Canada and Mexico, the company grows with continued focus on the continued and strategic investment in technological innovation areas of products

Our Track Record Is Proven For Delivering Exceptional Quality And Service. Providing Superior Technology Is What Earns Us New Business

The Andersons is a technology driven company. Whether we’re applying our advanced technology to improving the quality of the products we make or to the support services we provide, our customers are assured of receiving the highest level of professionalism.

Formulating With Our Dispersible Granule – DG LITE® – Technology Provides You With Cutting Edge Product Benefits And Marketing Advantages

Our granule expertise has always been a hallmark of The Andersons. For over 70 years The Andersons has manufactured and commercialized the proprietary DG concept, we have taken granular carrier basics and advanced them to entirely new performance levels. What it means to you that we’re able to apply our unique DG LITE® carrier technology to optimize your active ingredient and increase your product’s effectiveness. From the moment we receive your active ingredient, our quality technicians and chemists utilize proprietary technology and processes to ensure consistent results.

In a matter of minutes, one DG Lite 150 SGN particle becomes 190,000 dispersed particles when contacted with water.

WITH DG LITE TECHNOLOGY IN YOUR CORNER YOU CAN EXPECT YOUR PRODUCTS TO EXHIBIT:

† Rapid Dispersibility...quickly “dissolves” when water is administered
† Neutral pH...renders your pesticide stable
† High Uniformity...promotes consistent material application
† Extremely Durable (RTA >95%)...assures long term efficacy
† Spherical Shape...delivers consistent flowability and dependable ballistics
† Economical...near immediate dispersion virtually eliminates waste

The Anderson Turf & Specialty Group, originally established in the 1960s to serve the professional turf market, leverages its core competencies in nutrients, formulating, pesticide carrier development and supply chain management to serve some of the biggest global marketers of turf and ornamental products.

Our Mission:

- Provide extraordinary service to our customers
- Provide high-quality products
- Foster a culture of drive and excellence
- Create a powerful vehicle through which we channel our time, talent and energy in pursuit of the fundamental goal of serving God by serving others.

For more than 60 years, The Andersons, Inc. has been an integral to the northeast Ohio and regional agricultural sector. Through the acquisition of Imperial and together with our dedicated team, we have evolved into one of the largest and most diverse agriculture and grain processing companies in the U.S. As leaders in the industry, we are proud to have contributed to the nation’s leading grain loading facility in the Great Lakes and installing the largest steel tank grain storage facility in North America.

Since becoming publicly traded in the mid 1990s (NASDAQ: ANDE), The Andersons has made noteworthy investments in the ethanol business by acquiring ethanol plants and entering into various joint ventures, in addition to developing our own production capacity. Today, the Andersons’ ethanol plant portfolio includes in the United States, one in Canada and three in Mexico. We currently operate with combined facilities in the ethanol and renewable diesel markets in addition to our role in the agricultural and grain markets.
