LCH-40™

40% LIQUID CALCIUM HYDROXIDE (HYDRATED LIME SLURRY)

Safe. Tested. Proven.

- A recent benchmark study showed significant improvements in chemical activity and base availability compared to standard lime slurry solutions.
- LCH-40 has proven to be beneficial in water, wastewater, and acid neutralization applications.
- LCH-40 may be used as a safe and cost-effective alternative to liquid caustic applications.

EFFICIENT.

LCH-40 has a higher lime content than most lime slurries and requires no slaking equipment.

SAFE.

LCH-40 is dust-free and safe to handle.

COST-EFFECTIVE.

LCH-40 has a higher lime concentration, and reduces lime slacker maintenance and bag disposal costs.

MEETS STANDARDS.

LCH-40 meets the AWWA standard B202-93 and is certified to NSF standard 60.

For more information on how LCH-40 can be a solution for your water treatment needs, please contact:
